

Business Analytics SOLUTIONS

Customer support, market research, profitability, statistical analysis – companies need information about their businesses more than ever.

Business Analytics solutions from Mainline Information Systems® allow companies to gather, store, access and analyze corporate data to aid in decision-making. With Mainline's Business Analytics solutions, you will have the information you need, when you need it, and in the format you need.

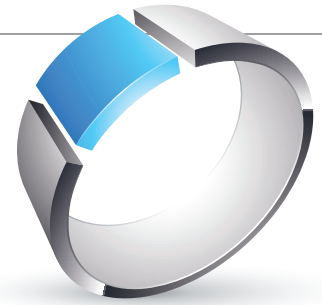

By integrating your enterprise-wide data and delivering self-service reporting and analysis, your business becomes more efficient. IT spends less time responding to requests, business users spend less time looking for information, and everyone spends more time making better decisions based on better information.

Our Services

Mainline's Business Analytics services solutions are delivered by highly-trained professionals who can provide any level of service you require — from offering recommendations to managing an entire end-to-end Business Analytics project. We employ senior consultants who have the expertise and skills to conduct planning sessions, manage vendor relationships, configure hardware and software, ease integration into your working environment and assist with data migration. Our professionals also offer post installation tasks, ongoing administration and skills that transfer to your technical staff, along with documentation of your new systems.

Benefits At-a-Glance:

- Maximizes the value of your information
- Optimizes your business processes
- Delivers trusted information in real-time
- Provides higher performance across the enterprise

“CIOs are coming under increasing pressure to invest in technologies that drive business transformation and strategic change. Business Analytics can deliver on this promise if deployed successfully, because it could improve decision making and operational efficiency, which in turn drive the top line and the bottom line.”
