

# Protect assets, employees and customers with an **IP VIDEO SOLUTION**

## IP Video Solutions from Mainline

In the past, the quality of surveillance cameras, with their fuzzy, black-and-white images, left much to be desired. Fortunately for today's businesses, Mainline has revolutionized the industry with a completely customizable, high-definition IP video surveillance solution for businesses and organizations, large or small. With its intelligent digital solution, the Mainline enterprise IP video surveillance system, the leading technology solution for the security and surveillance markets, can replace or enhance any typical analog video monitoring installation. Mainline deploys new, high-resolution digital HDTV cameras to give flawless color images - clear and verifiable images that can even be admitted as evidence in court.

But, it's not just the image quality that distinguishes Mainline's solution. Mainline offers an open, future-proof system that is scalable and easy to manage, even in a virtual environment. Mainline can help you turn data that your surveillance system captures into a corporate asset, information that can be used for facility planning, marketing analysis and crime deterrence.

In addition, Mainline makes this solution simple. Our solution is "plug and play" compatible on any IP network. All of our servers are TCP/IP addressable, and cameras are simply another device on your existing network, utilizing existing resources. This saves you the expense of creating and maintaining mutable networks.

### Some of the features of Mainline's IP Video solution:

- Plug and play compatible – devices sit on your existing IP network
- Ability to incorporate existing composite CCTV analog system on new IP-based open systems
- State-of-the-art video compression
- Automated archiving and retrieval
- Audio capture capability
- Smart Search pixel-based searching
- Fully programmable Pan, Tilt and Zoom (PTZ) cameras
- Administrator definable Wavelet compression puts user in control of image quality
- Remote access and diagnostic capabilities
- Standard category 5/6 cabling (POE) and wireless IP capabilities
- High-quality images even in low light and near infrared light conditions
- Pixel-based motion detection, with image buffering, provides the most time-sensitive alarm system on the market
- Interface with access control and POS systems
- Smart Video software plug-in tools

**Whatever your business,  
an IP video solution from  
Mainline can give you  
the advantage you need  
to control costs while  
increasing safety and  
productivity in today's  
ultra-competitive business  
environment.**

---

## What your business can achieve with digital video surveillance:

- Deter and detect unwanted events (rapid and effective responses leading to Actionable Intelligence)
- Minimize the risk of industrial theft (i.e. "shrinkage")
- Protect premises from threats to property and assets
- Protect employers from false liability claims (i.e. personal injury, slip and falls)
- Increase public safety and security
- Enhance and monitor employee health and safety standards
- Meet OSHA requirements/verify claims
- Monitor employee behavior to increase safety and security
- Use IP surveillance as a force multiplier for existing security resources
- Monitor customer behavior

## Why Mainline?

### People, Products & Performance

Mainline Information Systems became one of IBM's largest solution providers by ensuring that our customers have the best-designed solutions to meet their individual business needs. Our Digital Video Security specialists, along with our account executives and systems engineers take time to understand each customer's business, and then recommend technology to enhance that business. Our execution model combines local product specialists, senior systems engineers and customer care specialists, forming a team of resources that truly sets Mainline apart from other solution providers.

The quantifiable risks requiring video surveillance are different for every business environment. Regardless of your business model or needs, high-quality digital video surveillance is now a necessity. Our solution increases manageability and reduces total cost of ownership with simple integration of existing camera systems and new high-resolution digital HDTV cameras.
