EMC Technical Architect (TA) Certified personnel across multiple disciplines.

More than 500 employees throughout the United States

2014 deployments include:

- Semiconductor Company replacing NetApp with EMC VNX with VPLEX for Global replication

- Large Northeast university standardizing on Isilon to manage Medical Imaging

- Large Midwest medical center using VNX and VPLEX to process and replicate medical images and GreenPlum Big Data appliance to analyze medical records

- Global Managed Hosting company using VNX/VPLEX and Isilon to replicate DR environment from Northeast to Mid-Atlantic

- Public Networking Company replaced EqualLogic with VNX, chose Mainline as EMC partner of choice for new Data Center implementation

Why our clients choose to work with us:

- We have been around for more than two decades serving customers across many industries.

- We can assist from strategy/evaluation through technology selection to implementation and ongoing support. We offer a full IT lifecycle.

- We have real-world experience; our employees have been in your shoes.

- We are accredited by the International Enterprise Architect Institute, Inc., a neutral IT consortium focused on advancing the enterprise architecture.
